TECHNICAL SKILLS

Frontend
- React/NextJS, VueJS/ NuxtJS, JavaScript, JQuery
- CSS, TailwindCSS, Bootstrap, Framer Motion, Sass, Styled Components
- HTML/Blade/JSX

Backend
- NodeJS/Express/ FeathersJS
- PHP, Laravel
- SQL, MySQL, GraphQL, PostgresSQL
- NoSQL, MongoDB
- Redis

Others
- GIT, GitHub Actions, TypeScript

SUMMARY

Experienced and highly motivated, results-oriented Full Stack Developer, having 4+ years of experience. Offering a strong attention to detail and accuracy, effective problem-solving skills and possess the important ability to work in fast-past team environments. As a dependable individual, I strive to surpass expectations and excel in all endeavors. Additionally, I possess exceptional communication skills and thrive in collaborative environments, making me an excellent team player. I am highly adaptable and can quickly learn new technologies, enabling me to master various software stacks within a short span of time. To remain current with industry trends and advancements, I actively seek out and explore emerging technologies. Lastly, I have an open mind towards programming languages and do not limit myself to a particular one.

EXPERIENCE

Full Stack Developer (Contract), Genti — June 2023 - August 2023
SKILLS - Laravel, Axios, TailwindCSS, GitHub, JQuery, Sass

- Built and consumed functional and scalable APIs used in the web app to return useful data to the frontend used to populated datatables and useful analytical information.

- Collaborated with my Product Manager and team players to develop new features and roll them out.

- Built and scaled micro-services, integrated several payment gateways like Flutterwave, Stripe to enable payments.

- Created authorization feature that protected the admin dashboard, set up views that managed useful company data in datatables etc.

- Worked with Product Manager to analyze web application requirement and engineered solutions.

- Worked with UI engineers to develop multiple screens and experiences.

- Set up E2E, Unit, and Feature tests to ensure applications are able to handle various scenarios and maintain a high level of functionality, security, and performance throughout ongoing development and updates.

Full Stack Developer (Full-Time), Multilancer NG — March 2022 - January 2023
SKILLS - Laravel, Node/Express, TailwindCSS, GitHub Actions, React/ NextJS, GraphQL, PostgreSQL, TypeScript

- Engineered, developed and maintained both frontend and backend of multiple web applications using Laravel, React.

- Built and consumed functional, scalable RESTful APIs

- Collaborated with UI engineers to deliver frontend of various web applications.

- Setup CI/CD using GitHub actions to aid rolling out of new features.

- Employed TypeScript to enhance code quality, maintainability and ensured a more robust development process with static typing.

- In this role I used GraphQL to filter data returned from API's that fetch data from PostgreSQL powered databases to optimize usability on several client apps on the frontend.

Full Stack Developer, Freelance — June 2019 - January 2022

- In this role I built and managed functional web applications for my clients.

- I communicated effectively and efficiently to deliver scalable web applications that were both functional and satisfied my clients.

- Leveraged server-side rendering (SSR) from using NextJS capabilities to optimize application loading times.

- Utilized Redis for efficient data caching, enhancing the speed and responsiveness of clients web applications.

SOFT SKILLS

- Organized, detail driven, meticulous planner and excellent time management skills.

- Excellent communication skills in written and spoken English.

- Demonstrates flexibility and adaptability in navigating through evolving project requirements and dynamic work environments.

- Passion for creating solutions, staying up to date with technology trends and up-skilling.

- Ability to make use of multiple web frameworks effectively.

- Takes initiative and demonstrates a proactive approach in identifying potential issues before they arise, contributing to smoother project workflows.

- Able to multitask and handle multiple projects at the same time.

- Expert solution seeker through skills like Google etc.

- Deployment to various platforms

- Dynamic and adaptable with the ability to collaborate with product managers/agile or scrum teams/ UI engineers to deliver functional product.
